DIRECTOR'S STATEMENT

The year 2022 was quite challenging but fruitful year for RUDEYA and our partners especially the community-based groups, youth associations and smallholder farmers. Access to funding remains a challenging feat/task, but RUDEYA and our grassroots beneficiary groups were able to record tangible and commendable results.

We are grateful to our donors mainly the European Union Delegation in Ghana who supported two consortium projects in which RUDEYA was a beneficiary through the SUSTAINABLE LIVELIHOODS PROJET and SUSTAINABLE NETS PROJECT (Building a Sustainable Protection Network to Eliminate child labor in the fisheries of Lake Volta). Our special thanks go to the International Tropical Timber Organization for their support in the project entitled “Enhancing the capacity of forest communities in forest governance, monitoring and community development projects in the Mankraso Forest District Ghana”.

We are grateful to our many partners including CISS, NECPACD, RMSC of the Forestry Commission and 30 MMDAs across Ghana who have provided the needed technical assistance and collaboration. Though funding and resources were limited we able to reach out to our target groups through your collaboration and partnerships. Our sincere thanks go to the numerous CBOs, youth associations, women groups, and smallholder farmers, consultants and volunteers who have helped us in diverse ways to accomplish our set targets in over 30 MMDAs in 2022.

Under the SUSTAINABLE LIVELIHOODS project, our contributions and achievements were in the agricultural value chain additions in beekeeping and cashew farming. RUDEYA were able to assist over 1000 smallholder farmers, and 200 small scale artisans in the fabrication of beekeeping tools and equipment. One thousand smallholder farmers received training in integrated beekeeping and cashew farming. The 1000 beneficiary smallholder farmers received inputs in the form of 22,000 grafted cashew seedlings, 500 beehive boxes, 500 bee suits and 500 smokers for beekeeping. The project has strengthened the capacity of smallholder farmers in agricultural value additions.

OUR PROJECTS IN 2022

SUSTAINABLE LIVELIHOODS : : LINKING SUSTAINABLE AGRICULTURE AND ORGANIC WASTE MANAGEMENT TO SOCIAL PROTECTION AND DECENT WORK FOR UNEMPLOYED YOUTH, SMALLHOLDER AND WOMEN FARMERS IN THE SAVANNAH ECOLOGICAL ZONES OF BRONG AHAFO AND NORTHERN REGIONS"
